DWS, « Digital Widget Services », est une application et un site internet, voulant être un service simple et minimaliste de gestions de widgets.

Avec un style simple et moderne, le noir et blanc a été la solution.

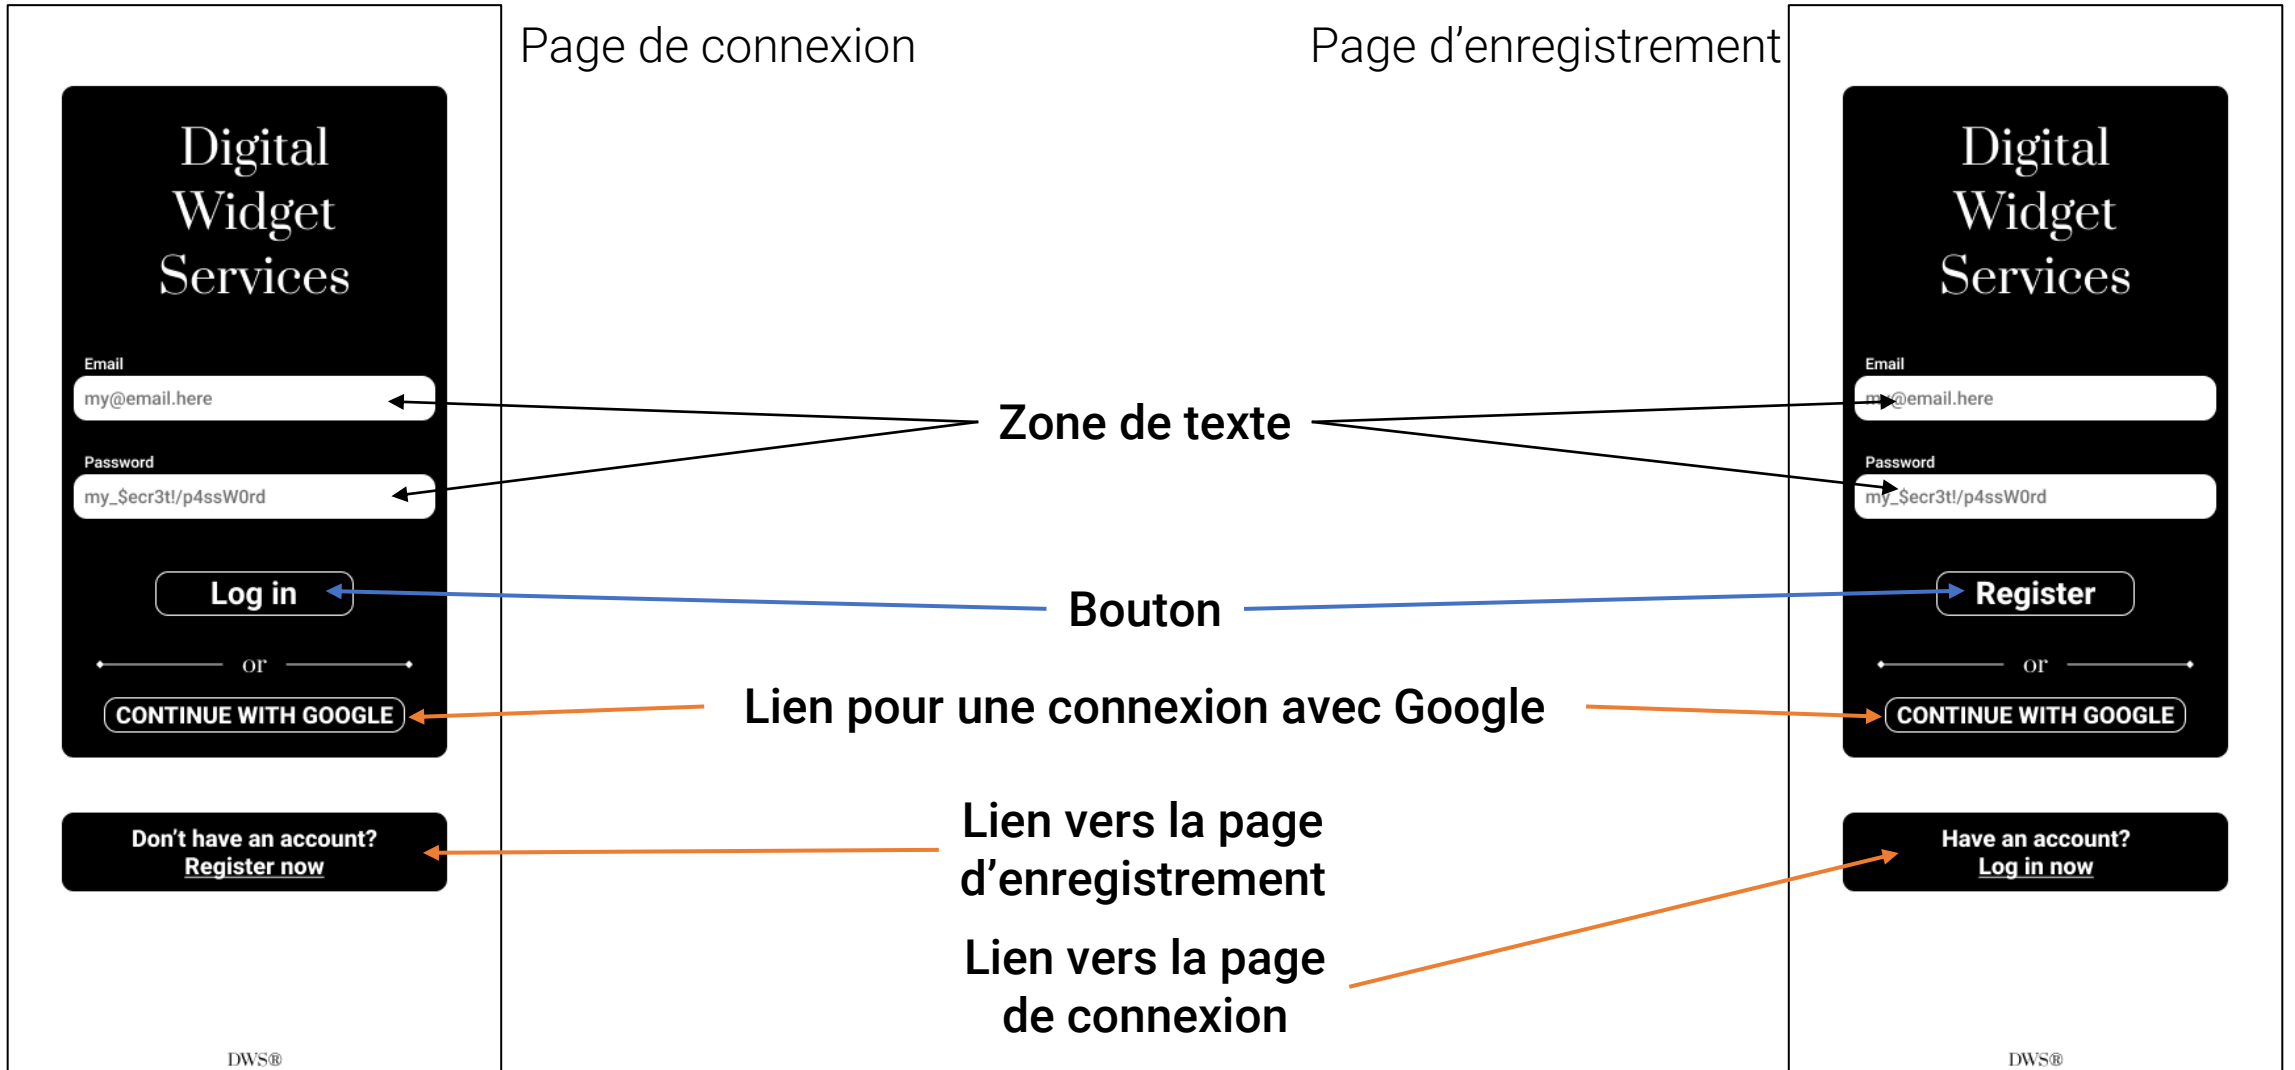

Les inspirations ont été diverses:

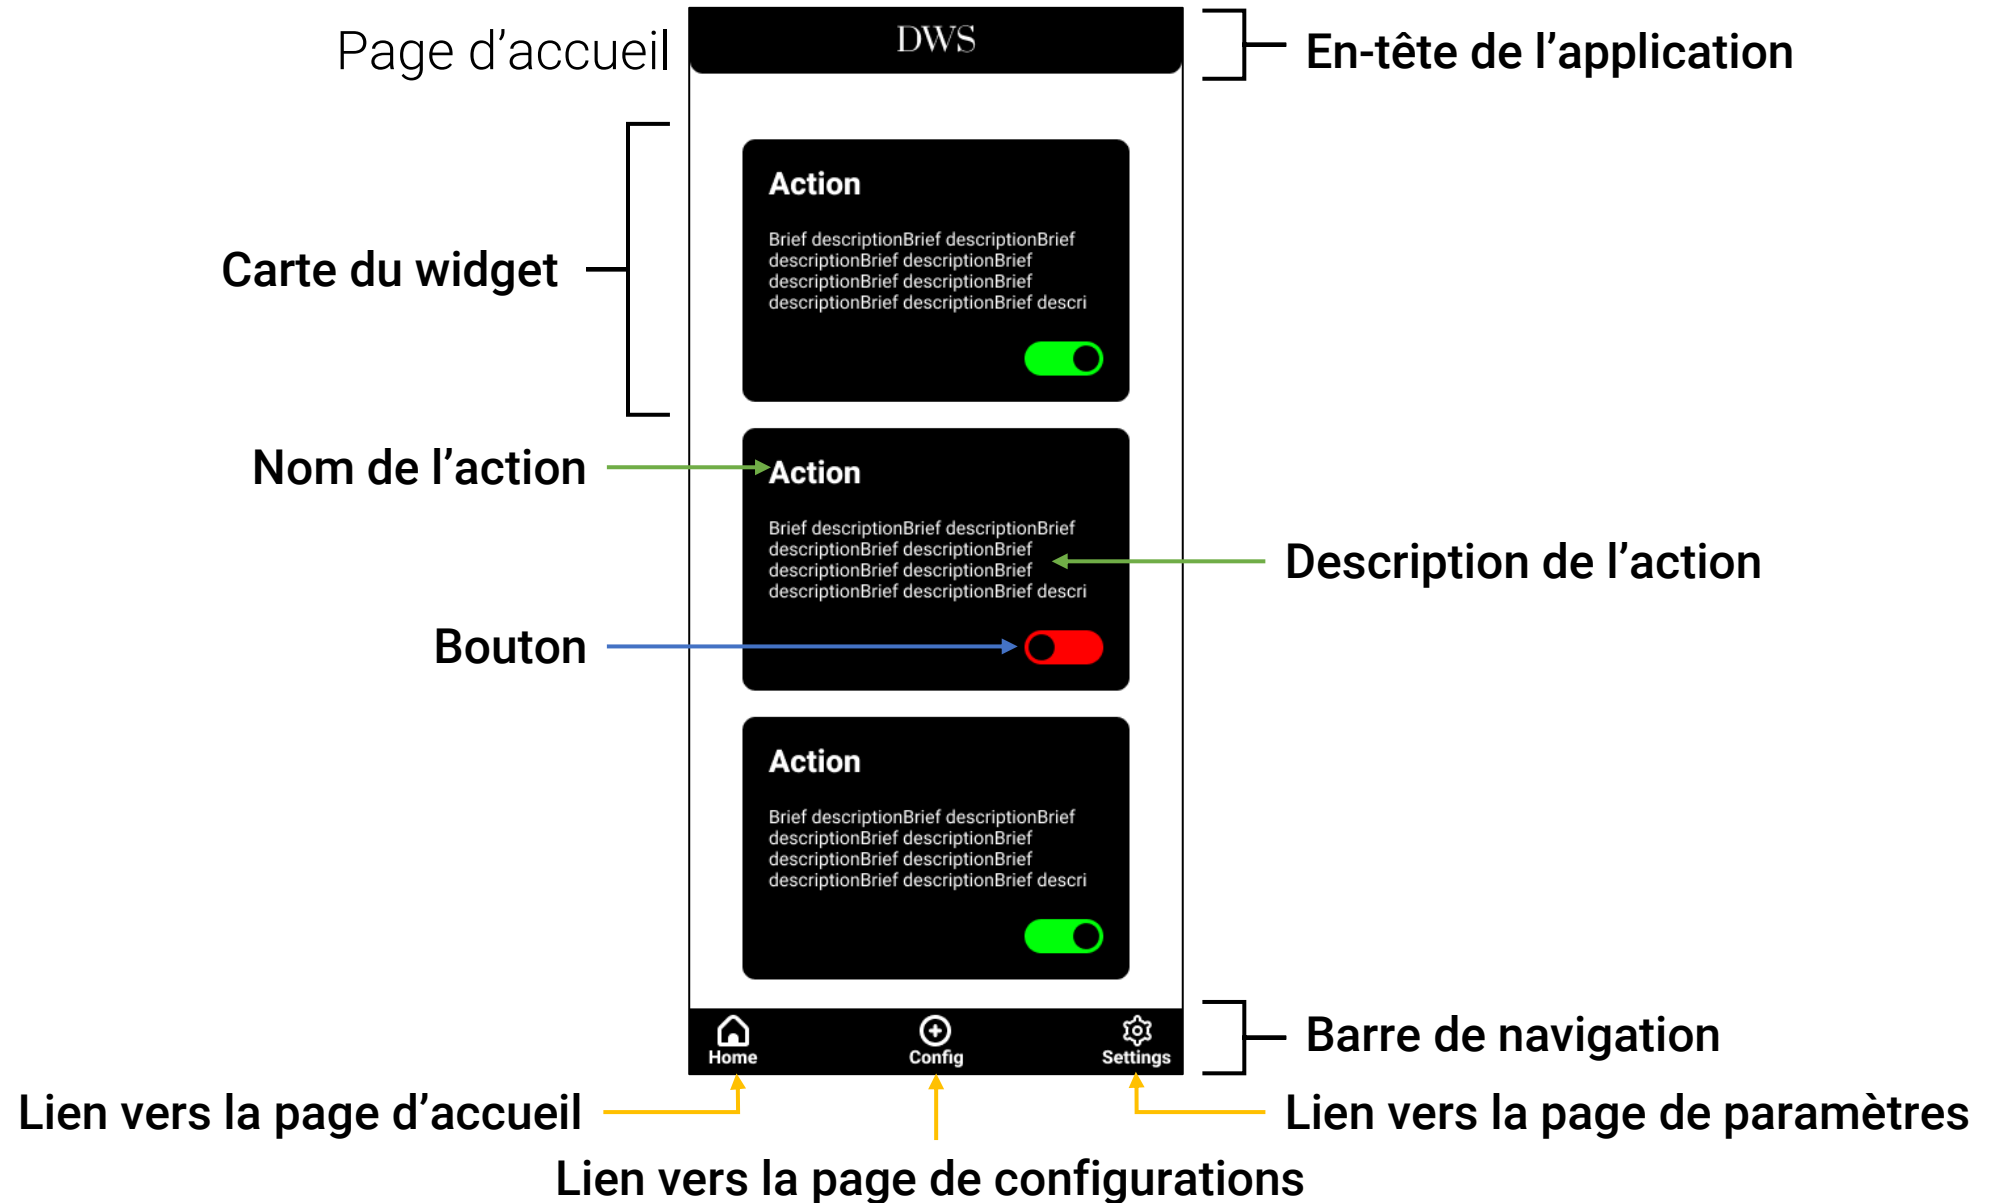

- Instagram
- Reddit
- IFTTT

# Composants

## Zone de texte

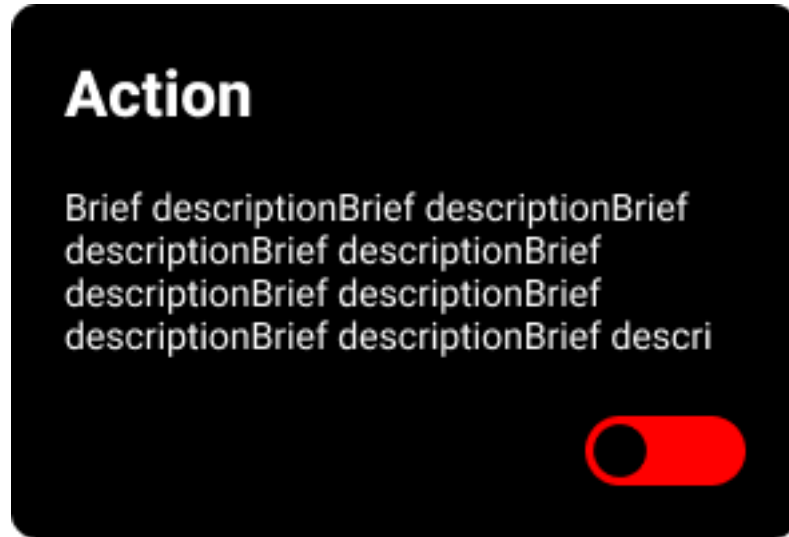

Zone de texte sans label

The diagram shows a dark gray rounded rectangle representing a text input field. Inside, there are two light gray rounded rectangles, each containing the word 'placeholder'. The top 'placeholder' is positioned to the right of the word 'label', which is written in a smaller, darker font. The bottom 'placeholder' is positioned to the right of the word 'label', which is also written in a smaller, darker font. This illustrates two states of the text input component: one with a label and one without.
